

**CONNECTOR CLIP FOR VERIFYING COMPLETE CONNECTION  
BETWEEN A CONNECTOR AND A PIPE**

**ABSTRACT**

The connector clip for verifying complete connection integrally includes a  
5 clip body of U-shape in cross-section to receive a tubular holding portion and  
a connection verifying portion of U-shape in cross-section to receive an  
opposite axial side of an annular verification projection with respect to the  
pipe. The connection verifying portion has a verifying body and a snap-fit  
portion. The clip body and the verifying body are connected via a connection  
10 part, while the verifying body and the snap-fit portion are connected via a  
joint part. Reinforcement ribs are formed along an entire circumference of  
outer surface of the verifying body.
